

Northern Cluster
for
Annual report 2025

Report compiled by
Mr Omar Abdullah
Northern Cluster Chairperson

Introduction

I would like to take the opportunity to thank all members of the Northern Cluster for given me the opportunity and trust to lead the Northern Cluster. It is not an easy journey as there is a lot of activities that need to be attended to but with the support of the Executive committee members the journey was made easier.

I would like to apologise to all members since when compiling the report, I did not receive any input from members of Northern Cluster.

1. The Cluster had many challenges during the year which impacted negatively in arranging cluster conferences. Hence, conferences / seminars did not materialise.
2. As the Chairperson, I tried to schedule meetings on teams as per the availability of members but to no avail.
3. At some points only a few members would accept or log on to the meeting, but a quorum was not realised. We require that we get the names and contact numbers of all University members as the contact information we having is outdated.
4. The cluster needs to get more involved and participate in the business of CAMPROSA and be more supportive to the respective clusters and universities.
5. Exco meeting was held but the challenges were that chairs could not give inputs on the activities and meetings of clusters due to meetings not been honoured.
6. One of our biggest challenges was to indentify which University belongs to which cluster as some Universities has a dual membership as they full under two clusters.
7. Exco also had meetings and tasks which was discussed in the meetings.

Challenges that we need to overcome in 2026

- Participation – Members should accept and participate in activities of CAMPROSA.
- Attend meetings- Members should accept meeting request and also send apologies if unable to attend meetings.
- Clusters should communicate among each other on information and concerns of the respective universities so that.
- List or update list of clusters so that our communication to our members can be send to.
- Emails of members and also creating email for all clusters as CAMPROSA

Seminars

- As a cluster we did not have any seminars which was planned by the cluster or join with Central Cluster.
- It is very important to have such seminars so that we can gain the knowledge and information from others.
- All activities that were not meet this year should be done earlier in 2026.
- Planner concerning
 1. meeting schedules
 2. Seminars
 3. Recruitments venture
 4. Marketing
 5. Training
 6. Partnerships with institutions
 7. Educating
 8. Sponsors

Conclusion

Going forward in 2026, the Northern Cluster must strive to attend to the 8 points that mentioned above. Exco cannot do this alone but when the clusters participate in the activities that is what will make this organisation shine as the name is stating.
